What Our Client Says

"Shreeji Softinfo helped us deliver business intelligence solutions for our business with the speed, attention to details and accuracy that we could not even expect. The team goes extra mile and works towards solving our issues proposing non-standard ideas."

-Huda Lighting

"We have been working with Shreeji Softinfo consultancy since 2018. The team is responsive, courteous, expert and very helpful. We worked with other MS partners from India and we frequently had difficulty working with them to get the result. I am really impressed by the quality of services we received from Shreeji Team. They always answer our emails, and are always available on Skype or Teams to answer our questions."

-System Solutions LLC

We hired shreeji SoftInfo consultancy for the Post implementation services of NAV (now known as Business Central). We are very happy with their services. The consultants of Shreeji Softinfo consultancy are easily available and they have a very good knowledge of D365 suite of products. I can say all the issues and implementation that we demanded have been attended by the Shreeji SoftInfo consultancy team!

-Lockett Holding INC

RDLC is a tough Job for most old-school Navision Programmers. I hired a few free-lancers before who couldn't accomplish this job. Jeet and his team invested R&D time for himself and accomplished this difficult task in a very good way. Shreeji team is very keen to accomplish the work, work was done in time and the quality was very good. I would hire them again if needed.

-Cloud Fashion

Jeet was very good at communicating what he had done and would follow instruction given to him. He would all the hours he could to ensure the job was done for you, including weekends at times which is really appreciated.
